**Displate DSA 2024 Transparency Report** 

Displate is a community built upon the utmost respect for our customers and the law. As a

service provider of an online website operating at www.displate.com and hosting provider in

relation to the content we aim to provide the customers with the ultimate experience regarding

our products. Displate is a global reaching company that sells its products in more than 50

different jurisdictions within and outside the EU – Displate is a dynamic, growing company

which continuously adapts and revises its processes to be in compliance with the changing

legal landscape.

Displate has a zero tolerance policy for rights infringement. Therefore, we ask Artists, Users and

Influencers to remember about it each time they are on the website and use its functionalities.

This is constantly reminded at different stages of using the website.

This report, covering the period from February 17, 2024 to December 31, 2024, provides an

overview of our content moderation practices and is created accordance with the transparency

reporting requirements under the European Union's Digital Services Act (Regulation (EU)

2022/2065) ('DSA').

The DSA establishes a legal framework for digital services providers across the EU, with a goal

of enhancing safety and accountability online. Displate is committed to upholding core

company values of building a community based on selling of artworks that are of the best

possible quality, legal, through a process that ensures compliance and the best experience for

www.displate.com

all persons involved.

**Displate**Prints on metal

This 2024 DSA Transparency Report provides insight into Displate efforts to support an online

marketplace in compliance with the DSA. Our main goals are:

1) Setting clear rules for upload of User Generated Content with compliance with the law,

2) Protection of rights of IP owners,

3) Content moderation based mainly on reports by users and supplementary voluntary

moderation by the Displate Team,

4) Quick, decisive and adequate action against illegal content, and bad actors,

5) Ensuring a proper appeals procedure is available,

6) Including automated mechanisms and basic AI tools to aid human moderators in

tackling illegal content and have a better experience for customers.

Key areas of focus for Displate are:

• Maintaining Marketplace Integrity: We removed 3404 artworks after manual review during

the period covered by this report. We also took action against 4561 user accounts, including

banning 249 accounts and freezing 4312 accounts to uphold our policies and legal

requirements.

• Handling of rights violations: Through our notice and takedown mechanisms (Takedown

Request, communication directed to our Marketplace teams and Customer Service through

multiple communication channels) we received and processed 340 notices of content that

potentially violated the law. Of these, we confirmed and actioned on 329 of those. Our median

response time was 48 hours.

• Constant upgrades to moderation tools: We continue to enhance our content moderation

systems - we started testing additional automated tools and set up better human review

procedures to protect our marketplace and improve Displate users experience. We update our

tools based on performance metrics and trends, and our strategic initiatives have included

increasing control precision, launching new AI and machine learning models to aid human decision making process, and improving workflow efficiencies.

Below is a in-depth analysis of Displate's compliance under DSA.

## Table of content

1.	Orders from EU Authorities to Remove Illegal Content:	5
2.	Notices Submitted via Notice and Action Mechanism:	5
3.	Content Moderation Practices:	7
4.	Handling User Appeals	. 13
5.	Automated Content Moderation:	. 13
6.	Out of Court Dispute Settlement (ODS)	. 14
7	Suspensions and Closures of Accounts	14

1. Orders from EU Authorities to Remove Illegal Content:

During the reporting period, Displate did not receive orders from EU Member State authorities

to remove content deemed illegal.

2. Notices Submitted via Notice and Action Mechanism:

As part of our notice and action process, 524 notices were submitted regarding potentially

violating content. These notices include both illegal content (340 notices) and content that is

legal but violates Displate policies (184 notices). Some of those included more than one

artwork.

Displate has in place notice mechanisms allowing users, individuals, and entities to notify

Displate of allegations relating to potentially illegal content. These mechanisms are available

and easily accessible. Notice and action claims in the period reported could be sent via:

1) dedicated mechanism (Takedown notice) available at the website – which is intended

mainly for IP violations;

2) direct contact with Displate through:

a. Emails;

b. DM's on social media platforms on which Displate has a presence;

c. Post sent to the office or factory;

d. Phone calls;

e. Basic chatbot (which focuses primarily on report a stolen artwork - IP violations)

and requests for removing from the store art sexualizing a child;

Once Displate receives such a notice, a designated team reviews the reported content in line with Terms of Use and other relevant documents. Instances of duplicate notice are handled by applying the original manual decision, to avoid conflicting decisions. Following review of these user notices, we removed the content from ca. 84% of these reports, reinforcing the valuable role of our community participation in policy enforcement.

For the period covered by the report it can be summarized as follows:

Type of the content in question	Reports	Reports	Processed by using	Basis for the		
		ending in	automated means	action		
		removal				
Illegal or harmful speech	0	0	n/a	n/a		
(harassment, vulgarity, and hate						
speech)						
Intellectual property infringements	340	329	0	Terms of Use,		
				statutory law		
				provision		
Protection of minors	0	0	n/a	n/a		
Spam (similar or identical content	0	0	n/a	n/a		
reupload)						
Displate Community Standards	0	0	n/a	n/a		
violations						
Adult	19	9	n/a	Terms of Use		
Technical issues	165	104	n/a	Terms of Use		

On average, we took 48 hours to act on these notices. In instances where there are multiple

pieces of content reported, we calculate turnaround time as the time between when the notice

was submitted and the first action we take. Longer handling of the matter occurred when:

1) Notice was lacking proper documentation – mostly power of attorney to represent the

IP owner with regard to notices on IP infringement or documents confirming ownership

of IP, which resulted in need for further communication and clarification.

2) Notice did not specify the artwork in question or the precise nature of violation, which

resulted in the need for further communication and clarification.

In such cases decisions can require different time frames due to specific nuances. More

complex decisions may require additional guidance from specialized staff and therefore more

time.

During this period no notices from trusted flaggers were issued as no trusted flaggers have been

designated yet. The number of reports in which the reporting person has explicitly referred to its

status as a trusted flagger: not available, as no report was made.

The number of exclusively automatically processed reports: zero, as the review of notified

content, the decision and the implementation of the decision is always carried out by a natural

person.

3. Content Moderation Practices:

We expect every user to follow our legal terms and policies, which are provided in the Terms of

Use (available at www.displate.com). Displate aims to be marketplace where creativity,

authenticity, and diversity thrive. As we operate a diversified portfolio of content, we have to

distinguish moderation practices to relevant sources of it.

**GWD Concept Sp. z.o.o.** 

One essential content source at Displate is the Marketplace with Artist generated content

When Artist opt in to uploading arts to www.displate.com and becoming part of our community

they commit to following Displate's Terms of Use which outline what can be uploaded on

Displate and Displate's standards. When uploading art, they are also informed about the

applicable rules. Every decision Displate makes precisely renders the reasoning for action

taken.

Displate strives to write rules and policies as clearly as possible to help members around the

world understand their rights and responsibilities. Our Customer Service and Marketplace team

is dedicated to helping understand the rules, and also detecting potential content violations and

enforcing our policies.

The Artists are required to upload only works which do not infringe upon the copyrights, moral

rights, publicity rights, privacy rights or any other rights of any person or third party, or violate any

law or judicial or governmental order, that are in line with Displate community standards and

are of certain quality. With regard to artworks that are not in conformity with such guidelines

certain actions might be taken by Displate:

1) The artwork may not be uploaded to the website,

2) The artwork may be removed from the website after uploading.

Artist that violate the terms of use, especially with regard to the upload of artworks violating

rights might:

1) Have their account banned,

2) Have their account frozen – with limitation set on number of artworks to upload at given

time interval.

Displate moderation process checks in good faith and in a diligent manner, on a voluntary basis

if the artwork is in compliance with the terms of use – if it is of proper quality, artistic value, does

not at face value contain illicit content (especially content violating IP licensing agreements to

which Displate is part, and which are part of operating licenses Brandshops), after which it is

usually uploaded to the website – unless the abovementioned investigation bars publication.

The exact moment of upload is determined internally by Displate based on a number of

objective criteria such us sales potential, user engagement potential, the backlog of artwork

waiting for upload. The uploading process is aided by AI based algorithms, but the final decision

rests on Displate personnel. The exact amount of artwork an artist might upload at a given time

is also determined by Displate - depends on objective criteria such as repetitiveness of the

artwork, the generated revenue, the technical limitations present at Displate, the marketing and

sales potential of previously generated art. The aim of this process is to have the most valuable

art uploaded first, so that customers have the best possible experience and can look at the most

interesting Displates possible.

After uploading the art may be checked by Displate (which is done in good faith and in a diligent

manner, carried out voluntary at own-initiative) and - in worst case scenario - removed from the

market place or it can be subject to takedown mechanisms mentioned above.

The second source of content are Brandshops

Displate operates not only a Marketplace for user generated content, but also Brandshops

where only officially licensed artwork appear – they are operated by Displate on behalf of certain

IP owners – this is based on licensing agreements entered into by Displate with said IP owners.

Artwork in the Brandshop is generated solely by Displate commissioned artists in tandem with

the IP owner – the design is fully approved and checked. As part of good faith and diligent

actions, Displate maintains a screening process for artwork uploaded to the Marketplace -

aimed at blocking content designated by Brandshop owners from appearing at the website. This

process is partially aided by AI based algorithms, but the final decision rests on Displate

personnel.

**Displate Club** 

Displate operates a subscription service known as Displate Club. One feature of this service is

the ability of users to print and buy Custom made products - based on artwork uploaded by

them. Users being part of Displate Club may at their own discretion upload artwork for personal

use and print on Displates (which are not publicly available for viewing or selling). Said artwork

is also subject to Terms of Use regarding the violation of rights of others and to quality

requirements and may be subject to order cancellation. Displate Club members who commit

gross violations of the Terms of Use may be banned from using the service.

In the period reported Displate had 10249 Custom Print orders from Displate Club members.

Of those only 261 orders were cancelled in accordance with the Terms of Use (i.e. illicit

content). 71 User accounts were blocked as a result of gross violations of the Terms of Use.

**Processing notices** 

Notices from our community members are an integral part of process of efforts to combat illicit

content - after the upload of the artwork this is the main focal point and most important

information source on possible illicit content. Displate strives to enforce our policies fairly and

hold all Artists and users accountable to the same standards to strengthen trust in our

community and maintain the integrity of our platform. We encourage users to report any

violations, and when we determine that an artwork violates Displate's policies we remove it (in

the most problematic cases we block the account).

A result of this process is the removal of the artwork from the marketplace and a notification

sent to the artist regarding the removal. The affected person can request a review of that

decision.

Over the reporting period, 3502 individual artworks were flagged and after subsequent manual

human review 3404 were removed for violating our policies. In most severe cases we ban the

account or freeze it (as described below).

Moderation tools and mechanisms

Displate uses aid from automated systems (for first-step validation and upload queue in the

Marketplace) to facilitate the process of human review (done in good faith and in a diligent

manner, carried out voluntary at own-initiative) by a dedicated team to evaluate and remove

policy-violating artwork – with the aim of acting expeditiously to remove or to disable access to

any illegal content. Displate invests in human reviewer training and improving precision in

available measures for a more accurate and efficient reviews. Human reviewers are provided

with various tools and resources when undertaking content review. For example, human

reviewers receive in-depth training and specialize in content moderation. Human reviewers who

review content alleged to be illegal receive distinct training based on the nature of their

respective work. We recognize that reviewing content can be challenging work - review teams

have to look at content that may be objectionable or graphic. We respect the difficulty of this

work and ensure reviewers have access to the resources they need to do their job and support

their health.

**Inclusion of automated systems** 

Displate uses automated systems (algorithms) to display certain artwork on the website with

internally established priority criteria - this includes:

1) the search results pages,

2) the "similar artwork" functionality,

3) the "related searches" functionality.

Those systems are based on algorithms which choose artwork for priority viewing by the

website's users based on Displate's internally developed criteria – the main purpose is to help

legitimate artists and present the most interesting and highest quality artwork to users -

removing repetitive art, low quality or similar art.

User moderated content

Displate also provides users with the option to use a Community Choice filter – providing them

with a selection of arts done by a variety of most influential artists gathered in the Community

Board. This selection is aimed at providing quick and easy access to content of the highest

www.displate.com

quality and best resonating with Displate's values.

**GWD Concept Sp. z.o.o.** 

Al. Jerozolimskie 123a, 02-017 Warszawa

NIP: 9512364589, REGON: 146543888

4. Handling User Appeals

To ensure accountability, we provide users with the opportunity to appeal moderation actions.

The criteria to determine the outcome of an appeal include a review of many factors including

account history, past warnings, artists portfolio, membership details - they are specified in

internal procedures and guidelines and strictly observed. This process is done fully without

automated means of decision making.

Between February 17 and December 31, 2024 there were 0 submitted appeals regarding

removed content or suspended accounts.

5. Automated Content Moderation:

As previously mentioned Displate uses automated moderations systems in the process for

aiding the personnel. Systems leverage pre-defined rules and machine learning to screen for

potential violations of our policies or to provide the best experience possible.

Displate continually invests in development of automated content moderation tools to promote

the safety and integrity of Displate's website and the best possible quality of prints and buying

process.

Displate monitors and tests the performance of automated controls that aid human decision-

making. This includes calculating precision for controls and maintaining dashboards to improve

the day-to-day operation of the system. Controls are categorized and tracked with specified

metrics, enabling human review and adaptation. As the decision making process is at the final

**Displate**Prints on metal

step based on human decision the accuracy rates and possible error rate of the automated

means used are not measured - the decision is not done by an automated system. Human

review is used as a final safeguard. Displate is also committed to continuous improvement of

enforcement at scale, involving regular monitoring, evaluations, and updates to controls based

on performance metrics and emerging trends. We're also investing in continuous improvement,

including increasing the accuracy of our automated flags, using machine learning (ML) models,

and migrating workflows to more efficient systems.

6. Out of Court Dispute Settlement (ODS)

During the reporting period, Displate was not aware of any users escalating disputes to certified

EU out-of-court dispute resolution mechanisms.

7. Suspensions and Closures of Accounts

To maintain the integrity of Displate marketplace and comply with regulations, we took action

against accounts that violated our content policies based on the nature and severity of their

behavior. We banned a total of 249 accounts, meaning these accounts were permanently

closed due to severe violations or other significant policy breaches.

Additionally, 4312 accounts were frozen, which temporarily suspended or limited certain

functionalities, such as uploading artworks. Freezing was applied in cases of less severe

violations or when further investigation was required.
